

# Hyperspectral mapping

The power of instantaneous mineral mapping

Octobre 20<sup>th</sup> 2009

# ***Powerful tool !***

***Moving from manual writing to machine printing***

# The origins of Photonic Knowledge

2002: Spin-off

Creation

**Photon** etc  
A spectrum of solutions

2009: Spin-off

Creation

**Photonic Knowledge**

Mining, oil and gas industries

- 2004 : Development of monochromatic filter
- 2007 : Development of a biomedical hyperspectral imager
- 2008 : Prize *Fondation Armand-Frappier*, emergent business  
*Photon d'or*, best photonic innovation in France

# The team behind the technology of Photonic Knowledge

- Astrophysicist
- Optic Physicist
- Engineers
  - Electrical
  - Mecanical
  - Software
- Programers
- Machinists
- Geologists
- Entrepreneur  
specialized in R&D

# What is Hyperspectral Imaging?

Multispectral imaging

Landsat 7

**Bands  
(discrete signal)**

**Hyperspectral  
cube  
(aka., hypercube)**

Hyperspectral imaging

VIS Camera of  
Photonic Knowledge  
(400-1000nm)

**Continuous signal**

# Characteristics of our Instrument

## Base

- Robust
- Modular

## Input (scene)

## Lens

- Interchangeable
  - Telephoto
  - Wide-angle
  - Macro
- Affordable

## Monochromatic filter

- Presently 10 nm
- Soon 2nm

## Digital sensor (CCD)

- 1536x1024
- 400-1000 nm

## Output Hypercube Format .fits

# An example in gold exploration

Grayscale & false color monochromatic images

1 2 3 4 5 6

5.53 0.02 0.01 <0.005 56.8 1.29

ppm Au

Mean spectra of samples

# Potential applications in the in the oil and gas industry

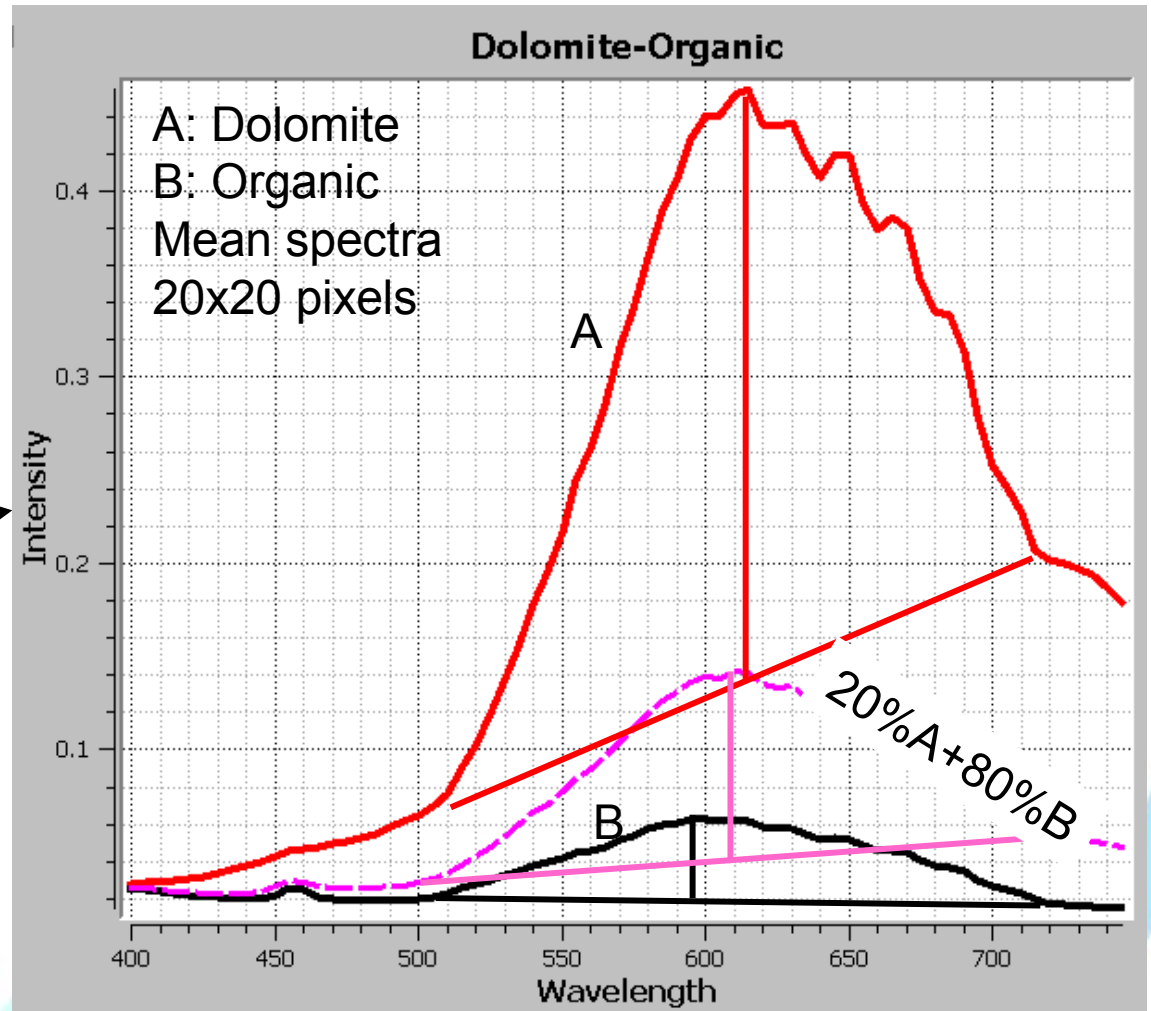

Mohawk Valley, New York  
Analog for dolomitic Reservoir

False color monochromatic image (630nm)

# Evaluation of organic material in dolomitic reservoir

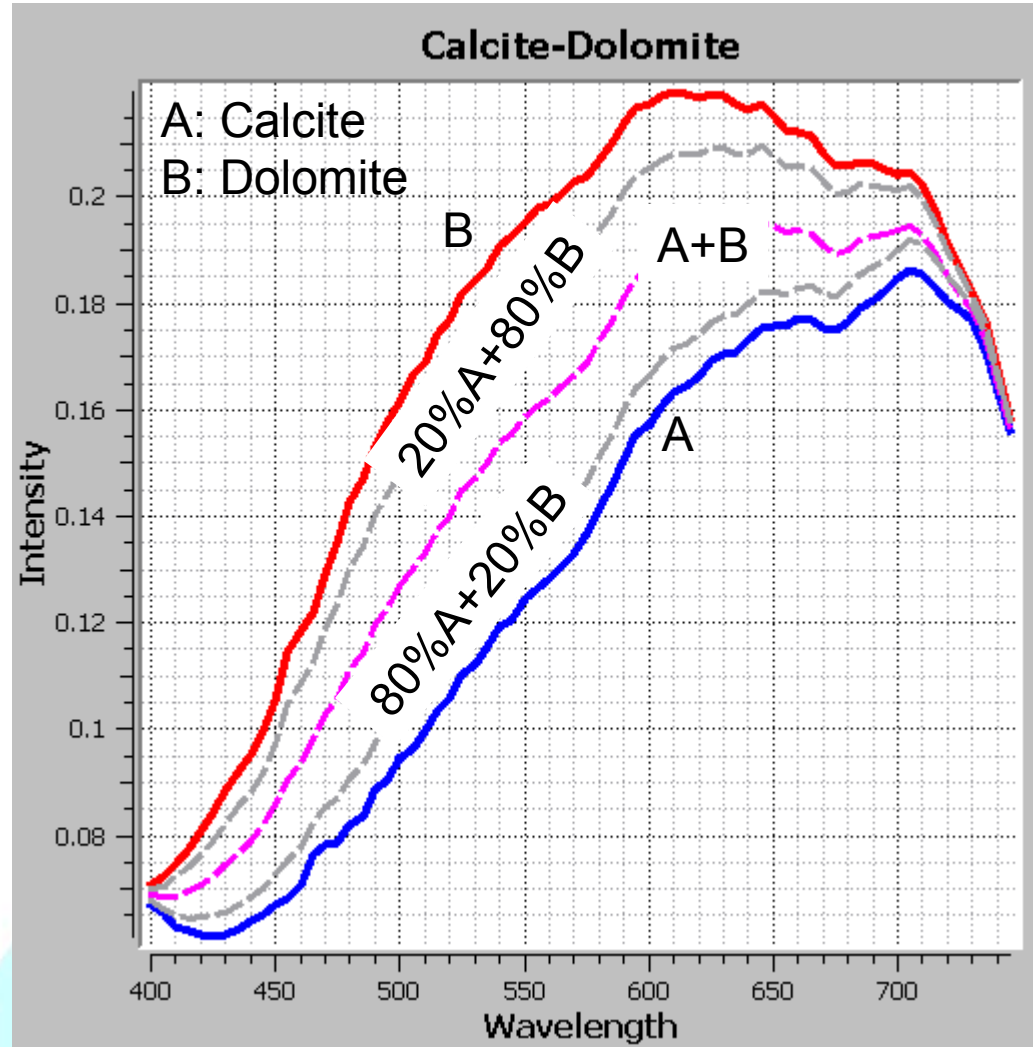

# Porosity in dolomite reservoirs

SEM Standards

Calcite

Dolomite

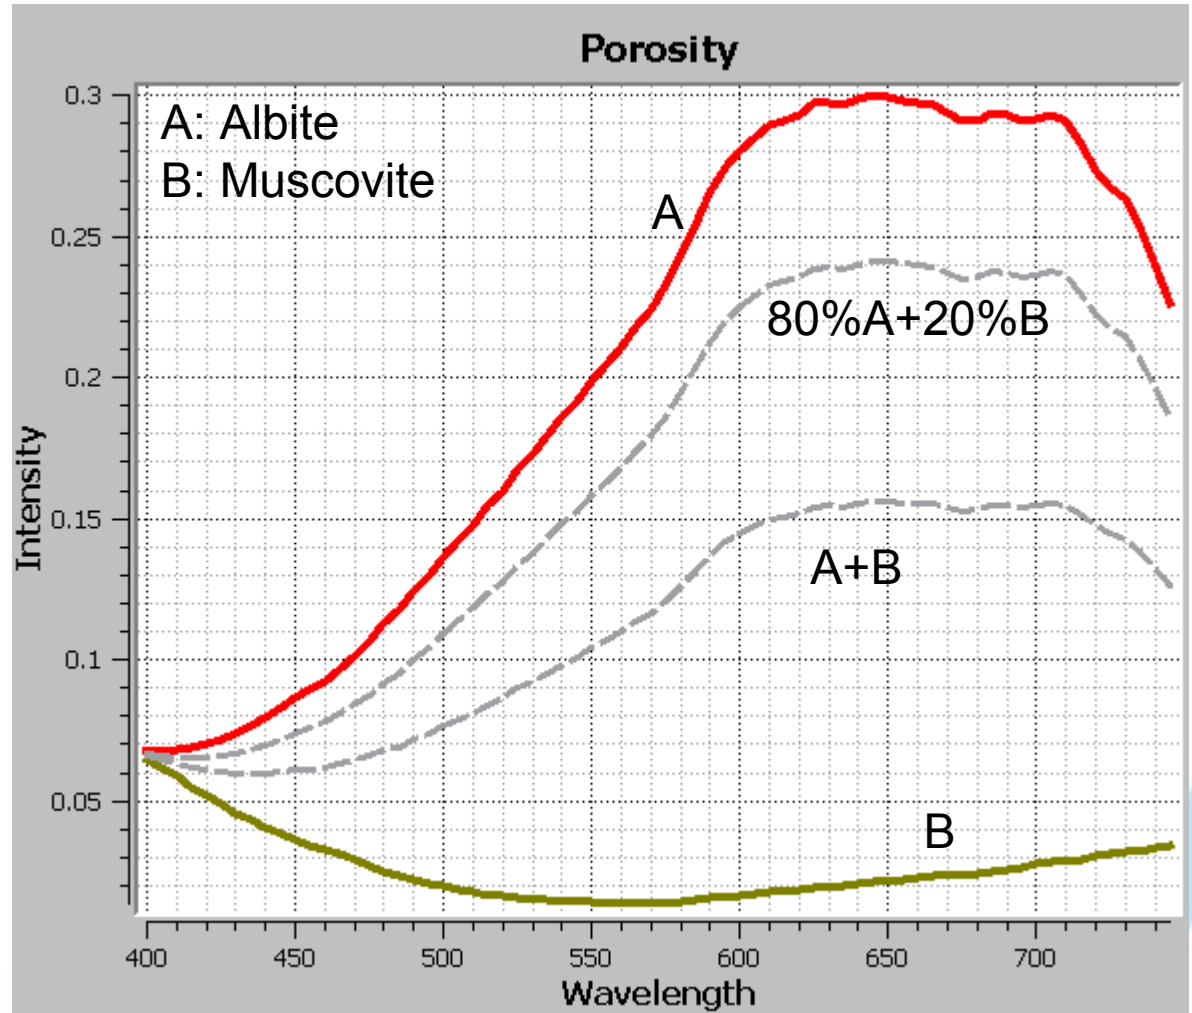

# Porosity in sandstone reservoirs

SEM Standards

Albite

Muscovite

# Planned improvements

- Data processing algorithms
  - Scale transfer from  $\mu\text{m}^2$  to  $\text{cm}^2$
  - Mineral mapping, qualitative to quantitative analysis
- Increase software user-friendliness
- Client-specific spectral libraries
- Assemble data into useful format for drill chips, core logging and oil sand mapping

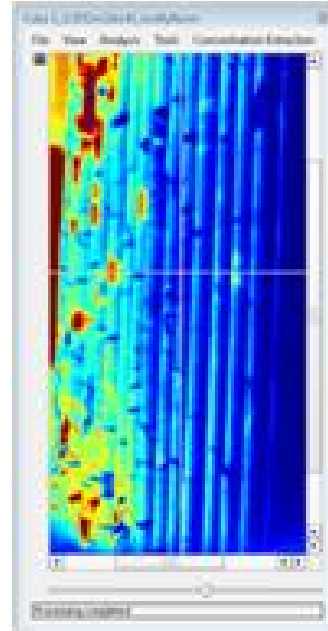

# Physpec example

# Flexible Field of View

Thin section  
(5cm distance)

Core logging  
(1m distance)

Face mapping  
(800m distance)

# Any questions?
